

YIHUA 268 Lifting magnifying lamp 5x 10x optical white glass

Main Function:

The new high power factor electronic ballast circuits, AC: 22W, the height of saving 80%;
High-frequency lighting, eliminating strobe lights;
Light soft, natural, lighting far, illumination wide;
Artificial Intelligence design , magnifying glass zoom 5X,10X;
Unique curved arm design, folding freely

Features:

1. Integration of magnifying and lighting, magnifications selectable;
2. Bright and stable light, no flash feeling, not harmful to people's eyesight;
3. White optical lens are available to relax the strain of eyesight after long time of use;
4. The Unique curved arm design, folding freely; Rod made of stainless steel, lifting freely
5. Applications: For electronic to view or check micro components or components densely-fitted circuit board, or for medical personnel and beautician to light or magnify.

Scope:

Applicable electronic engineering, chemical engineering, printing plate, philately, hardware;
Development of plant and animal specimens, jewelry accessories industry, the students read books, old newspapers.
